

Customer Journey Map

Date	12 August 2026
Name	Chahat Chouhan
Team ID	Individual Project
Project Name	AI-Brand-Voice-Generator
Maximum Marks	2 Marks

Phase of Journey	Stage 1: Discovery & Profile Creation	Stage 2: Content Generation & Customization	Stage 3: Quality Audit & Export
Actions (What does the customer do?)	• Signs up or logs in via Google/Email. • Pastes raw sample marketing copy into input areas. • Submits samples for AI voice extraction.	• Selects a content type (LinkedIn, Email, Ad Copy). • Adjusts tone sliders (formality, humor, urgency). • Enters topic and triggers copy generation.	• Reviews the generated copy. • Checks the AI Consistency Score and audit breakdown. • Refines output via side-by-side chat or exports final copy.
Touchpoint	• Authentication Screen (Tab 0).	• Copy Generator & AI Chat (Tab 2).	• Quality Audit & Export (Tab 3).

<i>(What part of the services do they interact with?)</i>	• Voice Analysis Engine (Tab 1). • Text Areas & "Analyze Brand Voice" Button.	• Dynamic Tone Sliders in Sidebar. • Input fields for topic and format.	• AI Consistency Scorecard. • Interactive Tailoring Chat Box.
Customer Thought <i>(What is the consumer thinking?)</i>	"I hope this tool actually understands our brand tone and doesn't just output generic corporate fluff."	"I want this post to be catchy and urgent without sounding overly salesy or informal."	"Does this sound 100% like us? The audit score looks great, and the chat refinement nailed the call-to-action."
Customer Feeling <i>(What is the customer feeling?)</i>	• Hopeful yet skeptical. • Relieved that sample inputs are saved automatically for future sessions.	• Empowered and in control. • Excited by real-time tone customization.	• Confident in brand compliance. • Satisfied with the time saved on drafting and editing.
Process Ownership <i>(Who is in the lead on this?)</i>	• Frontend UI Developer (Streamlit Interface). • NLP Engineer (Text Preprocessing & Feature Extraction).	• Prompt / LLM Engineer (Gemini API Integration). • UX Specialist (Sidebar Controls & Sliders).	• QA / AI Evaluation Engineer (Consistency Scoring Engine). • Database Administrator (SQLite History & Session Persistence).
Opportunities <i>(How can we improve this stage?)</i>	• Allow direct URL imports or file uploads (.pdf, .docx) for sample extraction instead of manual pasting.	• Add multi-language generation support and template presets for fast topic inputs.	• Add 1-click export options (Copy to Clipboard, Markdown download, or Direct Export to Social Media schedulers).
