

Coding & Solution

Date	12 August 2026
Name	Chahat Chouhan
Team ID	Individual Project
Project Name	AI-Brand-Voice-Generator
Maximum Marks	5 Marks

Solution Summary

Field	Details
Repository Link / URL	https://github.com/Chahat-Chouhan/AI-Brand-Voice-Generator
Programming Language(s)	Python 3.11, JavaScript (ES6+), HTML5, CSS3
Framework(s) Used	FastAPI (Backend), React.js (Frontend), Tailwind CSS
Key Features Implemented	• Automated brand voice extraction from reference text/documents using LLM integration. • Custom copy generation (social media posts, ad copy, emails) tailored to extracted tone profiles. • JWT-based user authentication and secure profile session management.

	• History log allowing users to review, edit, and export generated copy.
Pending / Incomplete Features	• Multi-language output support (planned for future release). • Direct social media scheduling/posting integrations (Buffer/Hootsuite APIs).
Setup / Run Instructions	1. Backend: Navigate to <code>/backend</code>, create venv (<code>python -m venv venv</code>), activate it, install packages (<code>pip install -r requirements.txt</code>), set <code>.env</code> with <code>GEMINI_API_KEY</code>, and launch (<code>uvicorn main:app --reload</code>). 2. Frontend: Navigate to <code>/frontend</code>, install packages (<code>npm install</code>), and start the dev server (<code>npm start</code>).

Code Quality Checklist

S.No	Criteria	Status (Yes / No)
1.	Code is modular and organized into functions / classes	Yes
2	Meaningful variable and function names are	Yes

	used	
3	Code includes comments / documentation where necessary	Yes
4	Error handling is implemented for critical operations	Yes
5	The application runs without critical errors	Yes
6	Code is committed to a version control repository	Yes

Additional Notes / Comments:

The codebase follows RESTful API principles and standard folder structure conventions (`/routes`, `/services`, `/components`). Asynchronous handling via FastAPI ensures optimal throughput when connecting with Google Gemini LLM services. All sensitive configuration keys are isolated using `.env` environment variables.
