## Functional Features Overview:

| S.No | Feature Name                       | Feature Description                                                                     | Module / Component              | Status (Done / In Progress / Pending) | Marks Contribution |
|------|------------------------------------|-----------------------------------------------------------------------------------------|---------------------------------|---------------------------------------|--------------------|
| 1    | User Registration & Authentication | Allows users to sign up via email/password or Google OAuth and receive JWT auth tokens. | Auth Module / Backend           | Done                                  | 0.5                |
| 2    | Brand Profile Management           | Allows users to upload sample brand text, create, edit, and store unique brand          | Profile Manager / Frontend & DB | Done                                  | 0.75               |

|   |                                  |                                                                                                                  |                                |             |      |
|---|----------------------------------|------------------------------------------------------------------------------------------------------------------|--------------------------------|-------------|------|
|   |                                  | voice profiles.                                                                                                  |                                |             |      |
| 3 | AI Brand Voice Extraction        | Analyzes sample content to automatically extract tone, vocabulary style, and key messaging rules via Gemini API. | AI Analysis Engine / Backend   | Done        | 0.75 |
| 4 | AI Marketing Copy Generator      | Generates customized social media posts, ad copy, and email templates aligned with the active brand voice.       | Content Engine / Backend & LLM | Done        | 1.0  |
| 5 | Interactive Copy Editor & Export | Interface to refine generated text, copy to clipboard, or export results as Markdown/T ext files.                | Dashboard UI / Frontend        | Done        | 0.5  |
| 6 | Generation History Log           | Stores previous generation requests and generated output history for quick user retrieval.                       | DB Storage / Backend           | Done        | 0.5  |
| 7 | Multi-Language                   | Allows                                                                                                           | LLM                            | In Progress | 0.5  |

|   |                                 |                                                                                            |                          |         |     |
|---|---------------------------------|--------------------------------------------------------------------------------------------|--------------------------|---------|-----|
|   | Output Support                  | content generation in multiple international languages maintaining brand tone consistency. | Wrapper / Backend        |         |     |
| 8 | Direct Social Media Integration | One-click auto-scheduling and posting directly to Twitter/X and LinkedIn.                  | External API Integration | Pending | 0.5 |

## Feature Summary:

| Metric                             | Count / Value |
|------------------------------------|---------------|
| Total Features Planned             | 8             |
| Total Features Implemented         | 6             |
| Core / Must-Have Features          | 5             |
| Additional / Nice-to-Have Features | 3             |
| Features Tested & Verified         | 6             |

## Feature Category Breakdown:

| S.No | Category                  | Features in Category | Example Features                                               |
|------|---------------------------|----------------------|----------------------------------------------------------------|
| 1    | User Interface (UI)       | 2                    | Interactive Copy Editor & Export, Brand Profile Form Dashboard |
| 2    | Backend / Logic           | 2                    | AI Marketing Copy Generator, AI Brand Voice Extraction Engine  |
| 3    | Database / Storage        | 1                    | Generation History Log & User Profile Data Store               |
| 4    | API / Integration         | 2                    | Gemini LLM Service Integration, Social Media Posting API       |
| 5    | Security / Authentication | 1                    | JWT Authentication & OAuth Login Gateway                       |
