## Demonstration of Proposed Features

| S.No | Feature Name              | Description                                                                        | Status (Implemented / Partial / Pending) | Demonstrated (Yes / No) | Remarks                                         |
|------|---------------------------|------------------------------------------------------------------------------------|------------------------------------------|-------------------------|-------------------------------------------------|
| 1    | User Input Interface      | Web form built with Flask to collect user inputs such as topic, context, and tone. | Implemented                              | Yes                     | Fully functional with input validation.         |
| 2    | Secure API Key Management | Environment configuration using <code>.env</code> to securely store Groq API       | Implemented                              | Yes                     | Keys safely stored and unexposed in repository. |
| 3    | Groq API Integration      | Integration with Groq API Generative AI to process inputs and return               | Implemented                              | Yes                     | High-speed processing working seamlessly.       |

|   |                         |                                                                                    |             |     |                                                 |
|---|-------------------------|------------------------------------------------------------------------------------|-------------|-----|-------------------------------------------------|
|   |                         | generation responses.                                                              |             |     |                                                 |
| 4 | AI Caption Generation   | Automatic generation of tailored social media copy/captions based on user prompts. | Implemented | Yes | Generates multiple post variations effectively. |
| 5 | Hashtag Recommendations | Dynamic suggestion of relevant, high-visibility hashtags based on post content.    | Implemented | Yes | Successfully outputs topical hashtags.          |
| 6 | CTA Suggestions         | Call-to-Action options generated alongside captions to drive user engagement.      | Implemented | Yes | Provides context-aware engagement prompts.      |

## Feature Implementation Summary

| Metric                          | Value |
|---------------------------------|-------|
| Total Features Proposed         | 6     |
| Total Features Implemented      | 6     |
| Total Features Demonstrated     | 6     |
| Overall Implementation Rate (%) | 100%  |
