

## Team Involvement in Demonstration

|               |                          |
|---------------|--------------------------|
| Date          | 12 August 2026           |
| Name          | Chahat Chouhan           |
| Team ID       | Individual Project       |
| Project Name  | AI-Brand-Voice-Generator |
| Maximum Marks | 1 Marks                  |

| S.No. | Team Member Name | Role in Demo          | Section Presented          | Contribution Summary                                                                                                            | Participation (Active / Passive) |
|-------|------------------|-----------------------|----------------------------|---------------------------------------------------------------------------------------------------------------------------------|----------------------------------|
| 1     | Chahat Chouhan   | Solo Lead & Developer | Entire Project & Live Demo | Designed and built the complete Flask web application, integrated the Groq API securely, and presented all features end-to-end. | Active                           |

## Team Coordination Notes

| Aspect                                 | Details                                                                                                                         |
|----------------------------------------|---------------------------------------------------------------------------------------------------------------------------------|
| Team Leader / Coordinator              | Chahat Chouhan (Solo Project)                                                                                                   |
| Overall Team Coordination Rating (1-5) | 5                                                                                                                               |
| Any issues during demo                 | A slight delay occurred during the live API generation request due to dynamic processing.                                       |
| How issues were resolved               | Seamlessly explained the backend API architecture and security setup while awaiting response payloads, keeping the flow smooth. |
